BACE (BALER AND COMPACTION EQUIPMENT) STATEMENT CONCERNING COVID-19 (CORONAVIRUS)

Dear Partners, Friends and Family,

I hope that this note finds you well. These are certainly trying times with a great deal of uncertainty so I figured I would reach out and share my thoughts on the crisis.

We continue to monitor federal, state, local and CDC recommendations for our employees, customers, partners and families health and safety.

I am happy to report that BACE has not seen any impact from the Coronavirus and will continue providing our customers with the same industry leading equipment, service and support. Should conditions change, we have Business Continuity and Disaster Recovery Plans in place.

I will state that I am an optimist and I remain so in the face of the spread of the Coronavirus. Many of us have tremendous responsibility for the lives of others due to the businesses and organizations that we lead.

In the face of this difficult season, it is up to all of us to keep our loved ones healthy and minimize the economic impact to our employees, customers, partners, families and friends. In terms of our own personal responsibility as citizens, we should certainly be doing all that we can to increase our own social spacing and do all that we can to contribute to efforts that suppress the virus. This is a civic duty of sorts and a small way that we can join in the fight. While the vast majority of us will not be severely impacted in terms of health, the last thing that we want to do is be a source of transmission to others that are elderly, infirm and vulnerable.

I have no doubt the incredible power of the human mind, ingenuity and scientific exploration will deliver a long-term solution to the Coronavirus. There are a number of drugs that are presently being tested that show promise against the Coronavirus. Some of these drugs are vaccines focused on preventing the virus and others have demonstrated the ability to reduce the impact of the disease in patients who acquire it.

As always, I would refer you the CDC web site for current Coronavirus information at <https://www.cdc.gov/coronavirus/2019-nCoV/index.html>

Here is a great resource to track the Coronavirus real-time, which currently shows over 75,000+ people have recovered - <https://ncov2019.live/>

We will get through this period and we will be stronger as a nation when this crisis subsides, but we need to buckle our chin straps for now.

Regards,

Frederick Waite
